Art Unit: 1625

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 19-58 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reichstein in view of Hinkley et al for the reasons of record in Paper No.

Applicant's arguments filed 1-29-2003 have been fully considered but they are not persuasive. The fact that aqueous sulfur dioxide is not preferred does not offset the clear teaching of Hinkley et al that it is suitable in the production of L-ascorbic acid from a derivative of 2-keto-L-gulonic acid. Note that it is the first example of the acid catalysts disclosed by Hinkley et al.

Further see Ex. 2 with regard to the beneficial effect of sulfite species to inhibit decomposition, etc. of ascorbic acid. Therein it is taught to add sulfur dioxide gas to an aqueous solution containing ascorbic acid prior to concentration and recrystallization of the derived oil.

Thus Hinkley et al would definitely motivate one of ordinary skill in the art to use sulfur dioxide as the acid catalyst in the classic Reichstein process for making ascorbic acid. The recitation of a continuous process does not predicate patentability since normally conversion to a continuous process is within the ordinary skill of the ordinary chemical engineer.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1625

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
